SUMMARY

Passionate and detail-oriented BSc Computer Science graduate (2024) currently pursuing a Full Stack Python Developer course. Equipped with strong skills in HTML, CSS, JavaScript, React, Bootstrap, Django, Mysql and C,I have hands-on experience in developing responsive and visually appealing websites. I thrive on tackling complex challenges and Am dedicated to creating seamless user experiences. Eager to bring my innovative mindset and collaborative spirit to a dynamic team, I am committed to contributing to transformative projects in the tech landscape.

PROJECTS

E-commerce Website
[REAL ESTATE E-commerce website]

- Developing a responsive e-commerce site for Real Estate using React, Bootstrap And React-Bootstrap.
- The platform provides a seamless experience for users searching for rental properties, including cozy apartments, spacious villas, and my modern houses.

PORTFOLIO

[VIGNESH Portfolio]

- My portfolio reflects my identity and highlights all of my projects, making it easy for you to explore them.
- I learned to manage REACT components and implement functionality using JAVASCRIPT, deepening my knowledge of state management and hooks.
- This process helped me establish a strong foundation in REACT, I utilized BOOTSTRAP for styling my portfolio to improve my CSS skills and establish a solid foundation in this area, along with adding a EMAIL.JS feature for sending messages.
- I make sure the portfolio is fully responsive because of I have used REACT BOOTSTRAP, which helped me develop the skills needed to create an engaging and adaptable user experience.

ADITIONAL PROJECTS

- Built foundational projects such as a calculator, a to-do app, and a weather app, demonstrating my core web development skills and eagerness as a fresher to learn and contribute effectively.
